

Your Choice

The purpose of Managed Care is to provide cost-effective, quality health care, which still preserves the basic right of each person in the CHOICE of their personal physician and hospital. No one likes to be “managed” in their CHOICE of health care provider.

Following from the mission and values of Monroe Clinic, CHOICE is the basic right Monroe Clinic strives to protect. For this reason, Monroe Clinic has a portfolio of various health plan options and provider networks, to meet the diverse needs of this area. This brochure outlines the CHOICES among the many health plan options and networks, which are presently available to area employers.

If the CHOICE you desire is not in our portfolio, please feel free to contact us, and we will do all we can to make that CHOICE available to you.

For more information about the CHOICES available to you:

- Contact your employer or agent for further information about any of the health plan CHOICES outlined in this brochure.
- For further information about any of the health plan CHOICES outlined in this brochure, or for assistance in other CHOICES which may not be listed in this brochure, contact Linda Sangrene, Contract Management Specialist for Monroe Clinic at 608-324-1226.

Eleven locations to serve all of your health care needs:

Due to space limitations, this matrix lists only the hospitals in-network for these various managed care plans. For information on whether the Physician of YOUR CHOICE is in-network for any of these managed care plans, call the 800 number listed or visit their web site. Because contracts change without notice, you should verify a provider's participation before making final decisions. X=Illinois and Wisconsin Hospitals are providers for Blue Cross/Blue Shield, if ID card has a "Blue Suitcase." Hospital network participation is accurate as of December 2007.
